

# IT'S SIMPLE AND CLEAN TO BE GREEN!

## CORES & CARTRIDGES RECYCLING PROGRAM

TransTech has formed a relationship with a local recycler to create a recycling program for ribbon cores and cartridges from plastic card printers. Send your used ribbon cores and cartridges to us and we will recycle them for you. By sending them to us you're helping to protect the environment and you'll be able to meet the requirements of many government and business customers. It's easy to do!

### The Details:

- ◆ TranTech will accept Cores and Cartridges for recycling as long as an equal or greater number of ribbons are ordered as replacements up to 10 business days before date the cores are returned.
- ◆ The product must come back to TransTech clean, with the ribbon removed.
- ◆ It must have a clear shipper address on the box & clearly marked "TTS Ribbon Recycling Program".
- ◆ The box must also be clearly marked with the replacement PO number or numbers.
- ◆ TTS is not responsible for any security of the actual ribbon if the ribbon is left on the cores.\*

\* For security purposes we strongly suggest you remove the ribbon when sending in your ribbon cores and cartridges. We reserve the right to refuse shipment if ribbons are left on. For added security, ask us about our [industrial shredders](#) to shred your ribbons.
