

Dear Valued Customer,

Back by popular demand, TransTech Systems is pleased to announce our 2012 Road Show schedule. Please join us for our free technical and sales training sessions over the course of two days in your choice of three cities with a possible fourth. These sessions presented by TransTech and manufacturer representatives will cover the latest products and topics to enhance the pre and post sales experience with your customers and grow your business.

The first portion of the event is dedicated to the Evolis Certified Training (ECT) class. This is the opportunity for you and your technicians to become fully trained on product assessment, troubleshooting, understanding frequently asked questions, as well as operation and repair of Evolis products including the new Evolis Zenius printer. You will also receive “tricks of the trade” directly from Evolis trained technicians.

The second technical training will cover MagiCard’s line of products including the new Rio Pro. Attending this session will enable you and your technicians to gain important technical knowledge of the full MagiCard range of plastic card printers. This will reinforce your reputation in the market and help your company provide a first level of after-sales service to your customers.

We will complete our trainings with a valuable Jolly Technologies workshop covering the latest Version 6 releases of ID Flow and Lobby Track.

Next, it’s the sales guys’ turn. Manufacturer reps will give exclusive sales presentations covering their range of products and the benefits of their diverse partnerships including: DataCard, Evolis, Farpointe Data, ITW Covid, Jolly Technologies, MagiCard, Nisca, and DSS. We are also pleased to unveil our latest complete inventory identification tracking solution by our new partner, [SimplyRFID](#). After, we will mingle during a fun mini-tradeshaw event complete with beverages and hors d’oeuvres.

Page 2 has a complete schedule of dates and locations. Again, this event is free to you and your associates with registration 1 month prior to each show. TransTech is not responsible for travel/ lodging arrangements or expenses, but we have secured discounted room rates for your convenience. Please [register online](#) or complete the [registration form](#) and email it to marketing@ttsys.com or fax to 503-682-0166. Shortly after, you will receive a confirmation of your registration.

Thanks again for your continued business and support. We look forward to seeing you there.

Sincerely,

TransTech Systems, Inc.
