

## ID-CAB 100 Secure Inventory Cabinet

*“Securing Production Materials For Decentralized ID Card Issuance”*

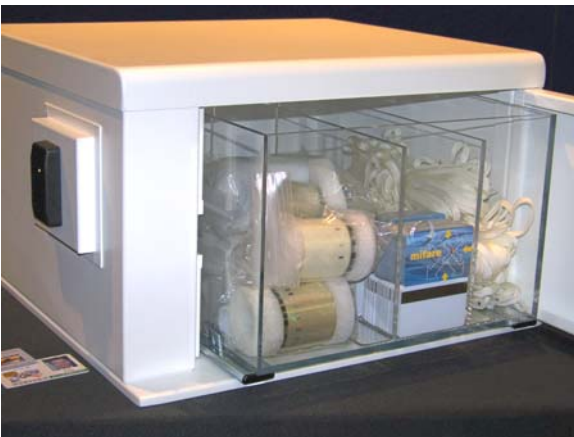

**DigiOn24**

### ID-CAB 100 Desktop Model

The ID-CAB 100 is a desktop security cabinet intended to secure ID card production materials for issuance volumes up to 3000 cards annually. The optional pull out tray (shown below) can store up to 2000, 30 mil cards, ribbons, security laminates, lanyards and other ID card production materials.

The ID-CAB 100 is ideal for remote ID card production offices with limited space. Each unit includes a secure HID access control Prox reader, an electronic locking system with tamper sensing, and built in alarm system.

### Benefits:

- Low in cost
- Small in size for desktop application
- Ideal for remote card issuance sites with lower volumes and high security requirements
- Same secure storage and locking mechanism as in the ID-CAB 1000 and 2000 models
- ID-CAB inventory management and tracking software included

### Features:

#### **Rugged steel metal cabinet design with**

- Intelligent controller with HID proximity access card reader
- Up to 1000 HID Prox® card memory storage
- Alarm relay output to central alarm panel
- Audible alarm for illegal access
- Door tamper sensor
- Over 2000 access records storage capacity
- Can be mounted to desktop/tabletop
- Can be stacked
- Optional cooling fan
- Optional pull out media tray
- Optional Mifare, or Motorola Indala Prox reader

### **Physical dimensions:**

- Base – 19.25” x 20” (Depth x Width)
- Total volume – 18”x 20” x 12” (DxWxH)
- Optional pull out tray – 16.5” x 14” x 8.5”
- Two adjustable dividers
