

Is your ID card system Totally Secure?

Your ID card investment is more than a card printer and software.

Have you considered these security risks?

- ☑ Used ribbons and holographic films - left over ribbons & films contain design detail and unique sensitive data that must be collected and destroyed.
- ☑ Internal theft - most fake ID cards are produced using material diverted by employees.
- ☑ Inadequate inventory control - critical custom holographic materials and cards cannot be accounted for in real time.
- ☑ Uncontrolled operator access - absence of access control and material handling reporting "who and when" to prevent theft.
- ☑ Easy duplication - low cost card printers, cameras and software allow for easy forgery of ID cards.

"KEEP YOUR COMPANY ID CARDS IN CHECK"

with

- ☑ D24 Encoder Kits
