

ASSET TRACKING

Tracking Everything with RFID

NOX (Latin for “night” or “darkness,”) is the covert surveillance system for asset tracking. NOX instantly transforms any facility into a secure fortress with the use of RFID technology. It is the full solution to track, locate, ship, or sign-out any asset or person and reduces expensive human errors. TransTech provides all critical components including readers, tags, and software. Installation support is included.

Highlights

- Visual and audio alarms
- Phone and email alerts
- Video still frames of events
- Assign asset removal privileges
- Custom integration and reports

Applications

- Rental equipment
- Expensive tools
- Electronics
- Sensitive documents
- High-volume shippers
- Attendance

Simple, Solid, and Proven

Asset Security and Surveillance - that shows you who takes what, when it happens.

Stock Room Check-Out - that automatically tracks tools, supplies, and IT assets to keep your team moving fast.

Automated Inventory - that pays for itself with a 96% labor deduction.

Intelligent Supply Chains - that reduces errors from 5% to 0.2%.
